eFilm vs. iQ-VIEW

End of eFilm – Fresh start with iQ-VIEW

What advantages does iQ-VIEW offer compared to eFilm?

Total cost of ownership
- Lower software license price and TCO
- Fast and dedicated product support in real time
- More licensing flexibility

DICOM and Data
- **Easy migration from eFilm to iQ-VIEW due to similar user interfaces**
- DICOM modality worklist client for study reconciliation or scanning (iQ-VIEW PRO version only)
- Comprehensive support of Asian character sets

Workflow
- Patient view vs. study view (especially for non-radiologist use)
- Adjustable icon size for any display resolution
- Query/retrieve multiple DICOM nodes simultaneously (if customers have several PACS)

Import and Export
- Comprehensive scan functionality for film or regular scanners
- Email client: Import DICOM data directly from encrypted email or send DICOM or JPEG data directly via encrypted email
- PDF to DICOM converter (iQ-VIEW PRO version only)
- Video capture functionality (iQ-VIEW PRO version only)

Imaging
- ROI window (best for chest doctors)
- Magnifying window with customizable size/zoom factor of window for mammo and X-ray
- Additional measurements, e.g. interior angle, ratio, etc.
- Additional image filters, e.g. smoothen, sharpen, remove X-ray grid (mainly for vet)
- 3 scoutline modes including polygonal cutting planes
- Dedicated veterinary tools

Integration
- Easy integration of iQ-VIEW with almost any RIS using GDT or other tools
- Easy integration of almost any 3rd party software with iQ-VIEW using iQ-LAUNCHER
- Flexible dictation software integration (additional cost) with a direct button in iQ-VIEW
